Home built by Knicon

Defined by a curated material palette, timeless design and elegant details, this kitchen is balanced in its design.

The clean, custom-built two-pack shaker profile white cabinetry matches the bifold doors of the walk-in pantry with ease. This is a seamless blend of appliance space doubling as zoned storage within the open-plan kitchen.

Durability and classic design are at the heart of this kitchen, with generous drawer space thoughtfully integrated throughout the cabinetry creating a space made for both functionality and flow.

With a wide window on the rear wall, the space feels open and airy, bringing natural light into the space with ease.

Visual contrast adds depth and character to the space. The sleek ivory tone of the surrounding cabinetry meets the charcoal hue of the island bench, anchoring the kitchen with ease.

Each bespoke design element was curated to meet the client’s needs. Appliances are integrated into the design of the kitchen with the fridge, dishwasher and concealed bin seamlessly blending in with the surrounding joinery.

Masterpiece Cabinetry is an expert in every part of the custom joinery process, from the initial design stage to planning and installation, the team is there for you at every step of your journey. From construction to renovation, the team is dedicated to crafting bespoke results.

Proudly servicing Victoria, the team is passionate about their craft, offering unique design, and high-quality joinery for clients.

Proud members of the Housing Industry Association (HIA) and Australian Cabinet & Furniture Association (ACFA), the team is dedicated to crafting one-of-a-kind cabinetry, which has resulted in being awarded the Best Kitchen Renovation Up to \$40k at the 2024 ACFA Awards, in a collaborative project with Marton Custom Builders.

Through intricate detailing, bespoke design and a tailored approach to each project, the expert team seamlessly transforms each space; from new homes to reviving the old, the design is built around your lifestyle and needs.
